This brochure provides information about the qualifications and business practices of Pzena Investment Management, LLC. If you have any questions about the contents of this brochure, please contact us at (212) 355-1600 and compliance@pzena.com. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Pzena Investment Management, LLC also is available on the SEC's website at www.adviserinfo.sec.gov.

SUMMARY OF MATERIAL CHANGES [Item 2]

This Item is used to provide our clients with a summary of material changes to the Brochure since our last annual amendment on March 28, 2024:

- Item 10: We added our Irish affiliate, Pzena Investment Management Europe, Ltd., in the “Other Financial Industry Activities and Affiliations” section.
- Item 12: We included additional language on our broker rotation process in the “Brokerage Practices” section. We note that this language reflects existing protocols under our Best Execution Policy.

ADVISORY BUSINESS [Item 4]

Principal Owners

Founded in late 1995, Pzena Investment Management, LLC (“PIM”) is a value-oriented investment management firm with a long-term record of investment excellence and exceptional client service. We believe that we have established a positive, team-oriented culture that enables us to attract and retain very qualified people. Since our founding, we have built a diverse, global client base of respected and sophisticated institutional investors, high net worth individuals, mutual funds, private investment funds, and select third-party distributed mutual funds, exchange-traded funds (“ETF”), and foreign funds, for which we act as sub-investment adviser.

PIM is 100% owned by its employee members and certain other partners, including former employees. Its founder and principal owner is Richard S. Pzena, who is currently PIM’s Co-Chief Investment Officer and Chairman of PIM’s Board of Managers.

Types of Advisory Services

PIM manages investment portfolios for endowments, foundations, state and municipal government entities, partnerships, corporations, investment companies, public funds, pension trusts, profit-sharing plans, high net worth individuals, and pooled funds located in the United States and in select foreign jurisdictions. PIM offers advice on equities, including exchange-listed securities, securities traded over-the-counter and foreign issues. PIM also manages a credit portfolio consisting of leveraged loans, high yield bonds, and other debt instruments that opened to clients in 2024.

Investment Restrictions

Clients may impose guidelines and restrictions on their accounts, however, all client guidelines and/or restrictions are reviewed prior to investing a portfolio to be sure that there are no issues which will prohibit PIM from managing the portfolio according to our investment strategy.

Assets Under Management

PIM advised assets of approximately \$66.8 billion as of December 31, 2024, consisting of approximately \$63.7 billion of regulatory assets under management (approximately \$626 million of which is non-discretionary) and approximately \$3.1 billion of other advised assets.

FEES AND COMPENSATION [Item 5]

Fee Schedules

PIM's investment management fees for separately managed accounts are generally charged quarterly.

PIM generally offers twenty-four equity strategies, and one credit strategy. PIM's offered strategies are listed below, along with current standard annual fee schedule ranges for managed assets, subject to PIM's minimum account sizes. Fee schedules are asset-based and, for all of its services except the U.S. and Global Best Ideas services, Long/Short Equity Value service and Focused Credit Opportunities service, include breakpoints.

Strategy	Standard Annual Fee Schedule Range
Global Focused Value	0.50% - 0.75%
Global Value	0.35% - 0.55%
Global Value All Country	0.37% - 0.57%
Global Value Climate	0.40% – 0.60%
Global Small Cap Focused Value	0.65% - 0.90%
Global Best Ideas	1.25%
International Focused Value	0.50% - 0.75%
International Value	0.35% - 0.55%
International Value All Country (ex-U.S.)	0.40% - 0.60%
International Small Cap Focused Value	0.85% - 1.00%
European Focused Value	0.45% - 0.65%
European (ex-U.K.) Focused Value	0.45% - 0.65%
Japan Focused Value	0.60% - 0.80%
Emerging Markets Focused Value	0.70% - 1.00%
Emerging Markets Select Value	0.55% - 0.70%
Large Cap Focused Value	0.35% - 0.70%
Large Cap Value	0.25% - 0.40%
Focused Value	0.50% - 1.00%
Mid Cap Focused Value	0.50% - 1.00%

Mid Cap Value	0.35% - 0.45%
Small Cap Focused Value	0.75% - 1.00%
SMID Cap Value	0.50% - 0.60%
U.S. Best Ideas	1.25%
Long/Short Equity Value	1.25%
Focused Credit Opportunities	1.25%*

* Focused Credit Opportunities includes a performance fee of 15% which is assessed on the outperformance relative to a set hurdle rate and is limited to qualified clients.

Generally, fees are not negotiable; however, individual portfolio considerations, investment size, and timing of opening have caused PIM to negotiate different fee arrangements from time to time. For investors in its proprietary funds, PIM is subject to certain side letter agreements that may provide different fee arrangements or other preferential terms as further disclosed in each fund's offering documents. The fees that are paid to PIM as sub-adviser to its mutual fund clients are set forth in each fund's registration statement.

In certain circumstances, PIM also manages accounts under performance-based fee arrangements in reliance upon Rule 205-3 under the Investment Advisers Act of 1940. Clients who are subject to performance fees will be qualified clients within the meaning of Rule 205-3. Under each of its existing performance-based fee arrangements, PIM receives an annual asset-based advisory fee and, if the account outperforms a specified benchmark, index, or hurdle over a specified time period, an additional fee based upon a percentage of the outperformance is earned. Certain of such arrangements also include a specified annual maximum combined fee. These arrangements may result in a total annual fee that is higher than our standard annual asset-based fees.

Clients whose cash balances are invested in money market funds with their selected custodian should be aware that most money market funds assess a management fee as an expense to shareholders. Any such money market management fee would be in addition to the advisory fee payable to PIM on account of such assets.

PIM is adviser or sub-adviser to twenty-five mutual funds and ETFs registered under the Investment Company Act of 1940. Under the advisory and sub-advisory contracts approved by the trustees and/or directors of each of these funds, PIM manages or advises on the investments of such funds; furnishes them with advice regarding the purchase and sale of portfolio securities; furnishes them with research, economic and statistical data in connection with fund investments and investment policies; submits reports relating to the valuation of fund securities; maintains certain books and records with respect to the fund's securities transactions; and either exercises or consults on the exercise of voting rights, subscription rights, rights to consent to corporate action and any other rights pertaining to fund assets. In exchange for these services, PIM receives an annual fee from the adviser

to each fund (or from the fund directly) that is payable on an annualized basis and generally calculated as a percentage of the applicable fund's average net assets.

In addition, PIM manages (1) an open-ended investment company with variable capital incorporated in Ireland and established as an umbrella fund with segregated liability between sub-funds that is qualified as a UCITS; (2) a Delaware statutory trust; (3) two Georgia collective investment trusts; (4) an Illinois group trust; (5) two Delaware limited partnerships; (6) an Australian registered managed investment scheme; and (7) a master-feeder fund structure with a feeder domiciled in Delaware and a master domiciled in the Cayman Islands. Please see the funds' or trusts' offering documents for information regarding management fees.

Deduction of Fees

Generally, PIM does not deduct fees from separate account client assets. However, in certain circumstances, we may do so when authorized. PIM or an affiliate does have the authority to deduct fees for certain of the funds it advises. Please see the applicable fund offering documents for further information.

Other Fees and Expenses

In addition to the management fee, clients will pay other fees and expenses in connection with PIM's advisory services. Such expenses may relate to custodian fees or mutual fund expenses, brokerage and other transactions costs. Clients are responsible for all other expenses. Please see the section entitled "Brokerage Practices" for further information.

Fund investors will be charged third-party expenses incurred on behalf of the fund, including without limitation, custodial fees, brokerage commissions, regulatory and other governmental fees, transactional charges, legal, and tax and administrative expenses. Please see the applicable fund offering documents for further information.

Prepaid Fees

PIM does not require clients to prepay fees in advance; however, clients may do so if agreed in the relevant advisory contract. When a client closes his, her, or its account, management fees are prorated to the termination date and the client receives a refund of the portion of any prepaid management fee that is not earned.

Compensation for Sale of Investment Products

Pzena Financial Services, LLC ("PFS"), an affiliated entity of PIM under common control, is a broker/dealer registered with FINRA and SIPC. Certain employees of PIM are licensed registered representatives of PFS and are compensated for the sale of PIM-advised pooled funds. This compensation is paid from the funds' advisory fee, which we believe mitigates the conflicts of interest inherent in this relationship.

PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT [Item 6]

PIM recognizes that incentive compensation associated with performance-based fee arrangements creates the risk for potential conflicts of interest. A performance-based fee structure may create an inherent pressure to allocate investments having a greater potential for higher returns to accounts of those clients paying the higher performance fee. To prevent conflicts of interest associated with managing accounts with different compensation structures, PIM generally requires portfolio decisions to be made on a strategy-specific basis. PIM also requires pre-allocation of all client orders based on specific fee-neutral criteria. Additionally, PIM requires average pricing of all aggregated orders. Finally, PIM has adopted a policy prohibiting portfolio managers (and all employees) from placing the investment interests of one client or a group of clients with the same investment objectives above the investment interests of any other client or group of clients with the same or similar investment objectives.

TYPES OF CLIENTS [Item 7]

PIM manages investment portfolios for endowments, foundations, state and municipal government entities, partnerships, corporations, investment companies, public funds, pension trusts, profit-sharing plans, high net worth individuals, and pooled funds located in the United States and in several foreign jurisdictions including, but not limited to, Canada, Australia, the United Kingdom, Luxembourg, and Ireland. PIM also provides model investment services to financial institutions and investment companies.

PIM typically imposes a \$10,000,000 account opening minimum on all accounts but offers smaller accounts subject to available service capacity. Depending on individual circumstances (including the size, portfolio service and opening date of the account), PIM may impose a different minimum on opening accounts, in its discretion.

METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS [Item 8]

General Description

PIM's investment decision-making is disciplined and systematic and based on comprehensive earnings forecasts and resulting company value as more particularly described below.

PIM's investment management activities are based on a classic value approach to investing, i.e., constructing portfolios of securities that are undervalued relative to their long-term earnings power. PIM's decisions are largely driven by its own investment research findings as supplemented by research obtained from brokerage and other firms.

PIM's Portfolio Managers and in-house Research Analysts do fundamental market research and draw on diverse sources of information such as company reports, research from brokers

or other investment managers, press releases, prospectuses, Securities and Exchange Commission filings, financial and trade newspapers and magazines, government and trade association data, scholarly journals, on-line quotation services and databases compiled by government agencies and others, and meetings with management, suppliers, clients, competitors, expert networks and industry consultants.

PIM's equity strategies follow a disciplined investment process to implement its classic value philosophy. First, we rank, from cheapest to most expensive on the basis of price-to-normalized earnings, the companies within the universe applicable to the portfolio strategy selected by the client. American and Global Depository Receipts (ADRs and GDRs) and U.S. traded foreign securities are included in all PIM universes.

The investment team then screens stocks that are among the most undervalued segment of the applicable universe. Research priority is given to the cheapest stocks that also offer portfolio diversification benefits. After completing our initial screening, we perform rigorous, in-depth analysis that often includes discussions with senior company management and/or on-site visits. Once we are committed to engaging in a research project on a company, our analysts are asked to approach each situation with the following question in mind, *“would we buy the entire business at the current price?”* We refine our earnings model, develop a final estimate of normalized earnings, and make a final investment decision. At this stage of the process, normalized earnings is the earnings level we expect the company to be able to generate within the next five years given their industry position and our judgment as to management's ability to successfully implement their strategic plans.

As a global investment management organization, PIM is committed to adopting and implementing responsible investment principles in a manner that is consistent with PIM's fiduciary responsibilities to its clients. This means that PIM analyzes and assesses the issues that are financially material to the companies we invest in, including, when relevant, environmental, social and governance (“ESG”) issues. In addition, PIM believes its communication with the management of companies PIM invests in and the voting of proxies for those companies should be managed with the same care as all other elements of the investment process. Through PIM's engagement with management, and its proxy voting, PIM seeks to exert a constructive, long-term oriented influence on the trajectory of the company.

PIM's commitment to ESG integration drives us to continually enhance our approach, which includes joining relevant industry groups. In 2018, PIM became a signatory to the Principles for Responsible Investment (PRI), a leading global responsible investment network of investment managers, service providers and asset owners. In 2020, PIM became a member of the IFRS (International Financial Reporting Standards) Sustainability Alliance, reflecting our focus on the financial materiality of potential investment issues. In 2021 PIM became signatory to the Japanese Stewardship Code, illustrating our commitment to active ownership. Most recently in 2022, PIM signed up to the Net Zero Asset Manager (NZAM) initiative.

PIM continually monitors and evaluates each position. Once a stock is added to a portfolio, we assess each new piece of information with the question, “*did we get it right?*” While the average holding period is approximately three to five years, the information available on a periodic basis gives us an ongoing scorecard to assess whether our expectations for a return to normal earnings are being met. Our sell discipline is ultimately guided by the same ranking system with which we originally screened the universe. We generally will sell a security when it reaches our estimate of fair value, there are more attractive opportunities, or there is a change in company fundamentals. In this way, we can avoid emotional inputs, and focus on the pure valuation level of each company

PIM’s Focused Credit Opportunities strategy is a concentrated leveraged loan and high-yield bond strategy seeking attractive returns across various market environments. The investment objective of the strategy is to achieve long-term capital appreciation through the combination of capital and income returns by applying our disciplined, research-based process. We strive to minimize the risk of capital impairment by investing in senior secured debt with conservative characteristics, such as low loan-to-value ratio.

We focus on investments in stressed senior debt of companies we consider good businesses, as we believe such debt instruments provide opportunities to earn materially high risk-adjusted returns. Our investment process follows this strict, repeatable series of steps: (1) identify potential opportunities by implementing a series of screenings; (2) conduct intensive fundamental research on the deals selected; and (3) hold Credit Investment Committee meetings regularly to discuss investment opportunities.

If an account agreement permits, PIM may use margin for client tax planning, to cover client cash needs and for other purposes. Whether or not an account agreement permits margin transactions is in the sole discretion of the client.

PIM generally offers twenty-four equity strategies, and one credit strategy, as follows:

Strategy	Approximate Holdings	General Universe (based on market capitalization)
Global Focused Value	40-60	2,000 of the largest companies across the world
Global Value	60-95	2,000 of the largest companies across the world
Global Value All Country	60-95	2,000 of the largest companies across the world

Long/Short Equity Value	50-90 long 40-80 short	1,000 of the largest U.S. listed companies
Focused Credit Opportunities	30 - 60	Below-investment-grade credit

Material Risks for Significant Investment Strategies

There can be no assurance that PIM will achieve its investment objective. PIM's assessment of the short-term or long-term prospects of investments may not prove accurate. No assurance can be given that any investment or trading strategy implemented by PIM on behalf of its clients will be successful and, because of the speculative nature of PIM's investment and trading strategy, there is a risk that investors may suffer a significant loss of their invested capital. The following list of risk factors does not purport to be a complete enumeration or explanation of the risks involved in investing with PIM. Prospective clients should read PIM's ADV Part 1 & 2 and consult with their own advisers before engaging PIM. An investment with PIM should only be made as a supplement to an overall investment program and only by investors able to undertake the risks involved.

Market Risk. The possibility that PIM's investments will lose value because of declines in the stock market, regardless of how well the companies in which PIM invests perform. This risk also includes the risk that the stock price of one or more of the companies in a client's portfolio will fall or fail to increase. A company's stock performance can be adversely affected by many factors, including general financial market conditions and specific factors related to a particular company or industry. This risk is generally increased for companies in developing markets, which tend to be more vulnerable to adverse developments. We invest in companies globally that may encounter disruptions involving power, communications, transportation, travel or other utilities or essential services on which they depend to conduct business. This could include disruptions as the result of natural disasters, pandemics, other international health emergencies, or weather-related or similar events (such as fires, hurricanes, earthquakes, floods, landslides and other natural conditions including the effects of climate change), political instability, sanctions, labor strikes or turmoil, war, or terrorist attacks. Although we continue to assess the potential impact of such events on the companies in which we invest, there can be no assurance that these events may not adversely affect our investment and may lead one or more of our investment strategies to underperform. Such disruptions may also affect our investment process by limiting our ability to complete our fundamental research in a timely manner.

Investing Process. PIM takes a considerable amount of time to complete the in-depth research projects that its investment process requires before adding any security to its portfolio. The process requires that PIM take the time to understand the company and the business well enough to make an informed decision as to whether PIM is willing to own a significant position in a company that does not yet have clear earnings visibility. However,

the time it takes to make this judgment may cause PIM to miss the opportunity to invest in a company that has a sharp and rapid earnings recovery. Any such missed investment opportunity could adversely impact the performance of PIM's investment strategies.

Value Investing Risk. PIM generally invests in companies after they have experienced, or are expected by the market to soon experience, a shortfall in their historical earnings, due to an adverse business development, management error, accounting scandal or other disruption, and before there is clear evidence of earnings recovery or business momentum. While investors are generally less willing to invest when companies lack earnings visibility, PIM's classic value investment approach seeks to capture the return that can be obtained by investing in a company before the market has confidence in its ability to achieve earnings recovery. However, this investment approach entails the risk that the companies included in PIM's investments are not able to execute as PIM had expected when PIM originally invested in them, thereby reducing the performance of PIM's strategies. In addition, during certain time periods, market dynamics may favor "growth" or "momentum" stocks. Disciplined adherence to a "value" investment mandate during such periods can result in significant underperformance relative to overall market indices and other managed investments that pursue growth style investments and/or flexible equity style mandates.

Portfolio Turnover. PIM has not placed any limit on the rate of portfolio turnover and portfolio securities may be sold without regard to the time they have been held when, in the opinion of PIM, investment considerations warrant such action. A higher rate of portfolio turnover involves correspondingly greater expenses than a lower rate and may result in taxable costs for investors depending on the tax provisions applicable to such investors.

Investment Selection. PIM may select investments in part on the basis of information and data filed by the issuers of such securities with various government regulators or made directly available to PIM by the issuers of securities or through sources other than the issuers. Although PIM will evaluate all such information and data and seeks independent corroboration when PIM considers it appropriate and when it is reasonably available, PIM will not be in a position to confirm the completeness, genuineness or accuracy of such information and data, and in some cases, complete and accurate information will not be readily available.

Concentration of Investments. At times, if PIM invests up to the maximum permitted under its investment restrictions in the securities of single issuers and/or in economic sectors this concentration and lack of diversification relative to a client's portfolio could mean that a loss in any one such position or a downturn in a sector in which PIM is invested could materially reduce a portfolio's performance. Thus, any substantial investment by PIM relative to overall assets in the securities of a single issuer or the concentration of PIM's investments in a particular industry may increase the level of risk.

Limited Capitalization Companies. Where applicable, PIM may invest a significant portion of a portfolio's assets in company securities with limited market capitalizations.

While PIM believes these companies often provide significant potential for appreciation, these securities involve higher risks in some respects than do investments in securities of large companies. For example, prices of small-capitalization and even medium-capitalization securities are often more volatile than prices of large-capitalization securities. The risk of bankruptcy or insolvency of many smaller capitalized companies (with the attendant losses to investors) is higher than for larger, “blue-chip” companies. In addition, since PIM’s position in these investments are often substantial, even partial sales of a substantial position into the market may cause the market price of PIM’s investment to decline and there is the risk that PIM may be unable to find willing purchasers for such investments when PIM decides to sell them.

Foreign Investment Risks Generally. Investment in foreign issuers or securities principally traded overseas may involve certain special risks due to foreign economic, political, social and legal developments, including favorable or unfavorable changes in currency exchange rates, exchange control regulations (including currency blockage), expropriation of assets or nationalization, imposition of withholding taxes on dividend or interest payments, and possible difficulty in obtaining and enforcing judgments against foreign entities. Furthermore, issuers of foreign securities are subject to different, often less comprehensive accounting reporting and disclosure requirements than domestic issuers. The securities of some foreign governments and companies and foreign securities markets are less liquid and at times more volatile than comparable U.S. securities and securities markets. Foreign brokerage commissions and other fees are also generally higher than in the United States. The laws of some foreign countries may limit PIM’s ability to invest in securities of certain issuers located in these foreign countries. There are also special tax considerations that apply to securities of foreign issuers and securities principally traded overseas. Investors should also be aware that under certain circumstances, markets that are perceived to have similar characteristics to troubled markets may be adversely affected whether or not similarities actually exist. Since foreign securities often are purchased with and payable in currencies of foreign countries, the value of these assets as measured in U.S. dollars may be affected favorably or unfavorably by the changes in currency rates and exchange control regulations. Some currency exchange costs may be incurred when PIM changes investments from one country to another. Currency exchange rates may fluctuate significantly over short periods of time. They generally are determined by the forces of supply and demand in the foreign markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors, as seen from an international perspective. Currency exchange rates can also be affected unpredictably by intervention by U.S. or foreign governments or central banks (or the failure to intervene) or by currency controls or political developments in the United States or abroad.

Emerging Markets. The risks of foreign investments described above apply to an even greater extent to investments in emerging markets. Where applicable, PIM may seek to exploit inefficiencies in the less developed equity markets. The economies of these markets may differ significantly from the economies of certain developed countries in such respects as GDP or GNP, rate of inflation, currency depreciation, capital reinvestment, resource self-sufficiency, structural unemployment and balance of payments position. In

particular, these economies may experience high levels of inflation. In addition, such countries may have: restrictive national policies that limit PIM's investment opportunities; limited information about their issuers; a general lack of uniform accounting, auditing and financial reporting standards, auditing practices and requirements compared to the standards of developed countries; less governmental supervision and regulation of business and industry practices, stock exchanges, brokers and listed companies; favorable economic developments that may be slowed or reversed by unanticipated political or social events in such countries; or a lack of capital market structure or market-oriented economy. Systemic and market factors may affect the acquisition, payment for or ownership of investments including: (a) the prevalence of crime and corruption; (b) the inaccuracy or unreliability of business and financial information; (c) the instability or volatility of banking and financial systems, or the absence or inadequacy of an infrastructure to support such systems; (d) custody and settlement infrastructure of the market in which such investments are transacted and held; (e) the acts, omissions and operation of any securities depository; (f) the risk of the bankruptcy or insolvency of banking agents, counterparties to cash and securities transactions, registrars or transfer agents; and (g) the existence of market conditions which prevent the orderly execution of settlement of transactions or which affect the value of assets. Different clearance and settlement procedures may prevent PIM from making intended security purchases causing PIM to miss attractive investment opportunities and possibly resulting in either losses to or contract claims against PIM. The securities markets of many of the countries in which PIM may invest may also be smaller, less liquid, and subject to greater price volatility than in developed securities markets. PIM's securities may be denominated in a variety of currencies subject to changes in currency exchange rates and in exchange control regulations.

Political Considerations. Since PIM invests in both U.S. and non-U.S. markets, the companies that PIM invests in may be affected by domestic and international political, social and economic conditions, any of which could negatively impact PIM's investment performance. There may be, for example, risk of nationalization, sequestration of assets, expropriation or confiscatory taxation, currency blockage or repatriation, sanctions, changes in government policies or regulations, political, religious or social instability or diplomatic or political developments and changes. Any one or more of these factors could adversely affect the economies and markets of such countries that in turn could affect the value of PIM's investments in their respective markets. Additionally, the political stability of some of the countries in which the less developed securities and/or derivatives markets operate could be even more volatile from that of certain developed countries and such risks may be heightened.

Liquidity Risk. Illiquidity in certain markets could make it difficult for PIM to liquidate positions on favorable terms, thereby resulting in losses.

Short Sales Risk. A short sale is the sale of a security which one does not own in anticipation of purchasing the same security in the future at a lower price to close the short position. A short sale will be successful if the price of the shorted security decreases. However, if the underlying security goes up in price during the period in which the short position is outstanding, investors in the Long/Short Equity Value Service may realize a

loss. The risk on a short sale is unlimited because the shorted security must be bought at the higher price to complete the transaction. Therefore, short sales may be subject to greater risks than investments in long positions.

Participatory Note Risk. Participatory Notes (“P-Notes”) are a type of equity-linked derivative which generally are traded over-the-counter. Even though a P-Note is intended to reflect the performance of the underlying equity security, the performance of a P-Note will not replicate exactly the performance of the issuers or markets that the P-Note seeks to replicate due to transaction costs and other expenses. Investments in P-Notes involve risks normally associated with a direct investment in the underlying securities. In addition, P-Notes are subject to counterparty risk, which is the risk that the broker-dealer or bank that issues the P-Notes will not fulfill its contractual obligation to complete the transaction.

Cyber Security Risk. The issuers of securities in which PIM invests are susceptible to operational, information security, and related risks from cyber security incidents resulting from deliberate attacks or unintentional events, and may include, but are not limited to: gaining unauthorized access to digital systems, misappropriating information or assets, corrupting data, and causing operational disruptions, including denial-of-service attacks on websites. Cyber security failures or breaches by a third party service provider and issuers of securities in which PIM invests have the potential to cause disruptions and impact business operations, potentially resulting in financial losses, the inability to transact business, violations of applicable privacy and other laws and regulations, regulatory sanctions including penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs, including the cost of insurance and measures to prevent cyber incidents.

Debt Investment Risk: Debt instruments held in PIM’s credit portfolios are subject to market risk, including the risk of adverse price movements associated with changes in credit ratings, and the risk that the underlying borrower defaults on its debt obligations, possibly resulting in loss of investment capital. Fixed-rate instruments also bear the risk that rising interest rates result in a diminution of their value as other debt instruments are issued in the market at higher prevailing rates. Leveraged loans and high-yield bonds generally have higher default rates and more volatility than investment-grade credit. Certain debt instruments such as loans and private credit have a longer settlement cycle than equities and more settlement issues, increasing both settlement risk and counterparty exposure. An extended settlement cycle along with potential liquidity considerations for certain positions means that it will take significantly more time to convert such investments to cash. Although deployed on a limited basis in the credit portfolios, use of leverage increases counterparty risk and the risk of additional losses in investment capital where an investment thesis is not realized. In addition, valuation of credit investments may involve subjective judgements rendered in accordance with PIM’s applicable policies and procedures. PIM may fair value an asset if it does not believe reliable pricing is available. While PIM seeks to strategically optimize its construction of a credit portfolio to maximize returns while reasonably diversifying exposure across industries, its portfolios are generally concentrated and there are no assurances that PIM will be successful in executing its credit investment strategy.

DISCIPLINARY INFORMATION [Item 9]

PIM has no disciplinary history to report.

OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS [Item 10]

Pzena Financial Services, LLC (“PFS”), an affiliated entity of PIM under common control, is a broker/dealer registered with FINRA and SIPC. Certain employees of PIM are licensed registered representatives of PFS. PFS does not engage in the execution of securities transactions for PIM or any other entity; its activities are limited to marketing private funds and mutual funds managed or advised by PIM.

Pzena Investment Management Europe Limited (“PIM Europe”), an affiliated entity of PIM under common control, is authorized by the Central Bank of Ireland as a UCITS management company pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (UCITS Regulations). Pursuant to this authorization PIM Europe is authorized to carry out collective portfolio management and individual portfolio management.

CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS, AND PERSONAL TRADING [Item 11]

PIM's members and employees may from time to time acquire or sell for their personal accounts securities that may also be purchased or sold for the accounts of PIM's clients. PIM has adopted a written Code of Business Conduct and Ethics designed to prevent and detect personal trading activities that may interfere or be in conflict with client interests or our current investment strategy. This Code of Business Conduct and Ethics generally requires that all transactions in securities by PIM's employees, their spouses and immediate family members who reside in the same household, whether or not such securities are purchased or sold on behalf of our clients, be cleared prior to execution by appropriate compliance personnel. Securities transactions for employees' personal accounts also are subject to monthly/quarterly reporting requirements, and quarterly and annual certification requirements.

In addition, the Code of Business Conduct and Ethics sets forth standards of business conduct that reflect PIM's fiduciary obligations and those of its supervised persons. The Code of Business Conduct and Ethics requires that PIM employees act with honesty and integrity, adhere to the highest ethical standards and comply with applicable federal securities laws. To that end, the Code of Business Conduct and Ethics contains a section entitled “Conflicts of Interest,” which requires that employees avoid conflicts as well as situations that have the appearance of conflict or impropriety. Moreover, certain policies such as the Insider Trading policy, which forbids employees from trading, either personally or on behalf of others (including mutual funds and private accounts managed by any such employees), on the basis of material non-public information and also from communicating

material non-public information to others in violation of the law, are incorporated by reference into the Code of Business Conduct and Ethics. The Code of Business Conduct and Ethics also contains prohibitions and limitations, as well as reporting requirements, regarding the provision and receipt of gifts and entertainment by PIM personnel.

PIM's Code of Business Conduct and Ethics also requires that employees obtain written approval from the Chief Compliance Officer ("CCO") prior to serving (i) on the board of directors or trustees of a publicly-traded corporation or business entity; (ii) in any advisory committee positions for any business, government or charitable entity where the members of the committee have the ability or authority to affect or influence the selection of investment managers or the selection of the investment of the entity's operating, endowment, pension or other funds; or (iii) in any positions on the board of directors, trustees or any advisory committee of a PIM client or any potential client who is actively considering engaging PIM's investment advisory services. Employees are required to report any violations of the Code of Business Conduct and Ethics and of applicable federal securities laws and they are encouraged to consult the CCO with respect to any transaction that may violate the Code of Business Conduct and Ethics. A copy of PIM's Code of Business Conduct and Ethics is available to clients and prospective clients on our website: www.pzena.com, or by writing to PIM at 320 Park Avenue, 8th Floor, New York, New York 10022 or to compliance@pzena.com.

PIM has adopted written policies and procedures for the allocation and aggregation of trades of securities that include provisions to avoid trading actions by proprietary and affiliated accounts that could result in an unfair or improper disadvantage to other client accounts. PIM's policy is to allocate and execute transactions for all client accounts in a fair and equitable manner. These policies extend to clients that are affiliated and/or unaffiliated with PIM. A copy of PIM's current Trade Allocation and Aggregation policies is available to clients by writing to PIM at 320 Park Avenue, 8th Floor, New York, New York 10022 or to compliance@pzena.com.

When securities are purchased or sold for any proprietary funds/accounts, those equity trades are subject to PIM's Trade Allocation and Aggregation policies and procedures. Such procedures are designed to ensure that no action taken by PIM or any of its principals, officers, employees, or affiliated entities would disadvantage its non-proprietary client accounts or advantage those proprietary accounts at the expense of such non-proprietary client accounts.

Except in limited circumstances, principal trades are not done by PIM or any related person. Some of the client accounts managed by PIM on a discretionary basis are accounts of employees and close relatives. Additionally, the members of the firm's Executive Committee and Board of Managers have invested in their individual capacities in an unaffiliated investment entity. Their participation is outside the scope of their employment by PIM and does not impact their business on behalf of PIM or its clients.

Conflicts of Interest

PIM and its affiliates may act as investment adviser or sub-adviser to a variety of mutual fund, separate account and private fund clients. The activities and interests of the firm and its personnel include potential multiple advisory, transactional, financial and other interests in securities, instruments and companies that may be directly or indirectly purchased or sold by PIM and for client accounts. Such activities and interests may give rise to potential conflicts of interest. These include, among others, the following:

PIM personnel may have varying levels of economic and other interests in accounts or products promoted or managed by such personnel as compared to other accounts or products promoted or managed by them. While the allocation of investment opportunities among the firm and the client accounts may raise potential conflicts because of financial or other interests of the firm or its personnel, PIM will not make allocation decisions solely based on such factors. PIM has a Trade Allocation and Aggregation policy that deals with these potential conflicts of interest. See “Brokerage Practices.”

PIM will give advice to and make investment decisions for client accounts as it believes is consistent with appropriate treatment of the client accounts. Advice given to one or more client accounts or investment decisions made for these accounts may differ from, and may conflict with, advice given, or investment decisions made for the firm. PIM manages all portfolios consistent with the respective investment strategy of each portfolio and takes into consideration any client specific guidelines or restrictions. Due to the factors listed, as well as issues such as the opening date of a portfolio and account cash flows, all portfolios within a specific strategy may not reflect the same holdings.

As mentioned in Item 5: Fees and Compensation, certain employees of PIM are licensed registered representatives of PFS and are compensated for the sale of PIM-advised pooled funds. From time to time, PIM adjusts the relative compensation levels for sales of some or all of these pooled funds, which can create a conflict of interest and encourage these employees to recommend certain pooled funds.

PIM manages a credit portfolio consisting of leveraged loans, high yield bonds, and other debt instruments. This strategy invests in debt of certain public and private issuers, which may, in limited circumstances, include debt related to public issuers whose equity securities are also held in client equity portfolios. Investing in securities of the same issuers as other clients across different levels of an issuer’s capital structure, or otherwise in different classes of an issuer’s securities or loans, may create certain conflicts of interest. Potential conflicts may arise when PIM and/or a PIM client invests in debt of a portfolio company while another client invests in equity securities of the same portfolio company. In the event of bankruptcy or insolvency, for example, the debt investor may have different incentives than the equity investor regarding the actions to be taken by the portfolio company, and certain investor interests may be subordinated or otherwise adversely impacted by the participation of differently situated investors. Similarly, in the event that additional financing is sought by the portfolio company, the interests of the differently situated investors may again diverge, with the actions of one investor potentially impacting the

value of another's investment. As PIM seeks to make investment decisions in the best interests of each portfolio, there is no assurance that a conflict will be resolved to the benefit of any single client. Further, it is possible that efforts to mitigate a conflict may result in PIM recusing itself from certain decisions or taking other actions that it would not take in the absence of a potential conflict.

Confidential information is regularly made available, subject to confidentiality or non-disclosure agreements, for the purpose of evaluating credit transactions. Any non-public information received under such arrangements is only permitted for use in evaluating the applicable credit transaction. While such information could be beneficial to equity portfolio clients where related securities are held, under PIM's applicable policies and procedures, such restricted information may only be shared with the equity analysts for the purposes of evaluating the applicable credit transaction.

Although PIM does not intend to access material non-public information ("MNPI"), there is the possibility that such information is inadvertently received. In the event PIM is unable to effectively wall off such information, trading in equity and/or credit portfolios may be adversely impacted as PIM would be unable to direct transactions in a portfolio name while PIM remains in possession of related MNPI. In such a case, the inability to buy or sell affected securities in portfolios could impact investment results.

While PIM does not anticipate that there will be any material impact to its clients, to ensure that conflicts are adequately addressed, PIM maintains applicable policies and procedures so that appropriate measures are taken to evaluate the potential impact of obtaining any information associated with an investment issued by any companies held in PIM portfolios. For purposes of managing the potential conflicts which may arise from PIM investing in the same issuer for both its equity clients and its credit clients, the CCO may erect an information barrier around certain credit strategy access persons, and others, as necessary. If an information barrier is put in place, such persons are required to withhold any information surrounding the issuer from any other PIM employee and may not have any discussions or provide any input into investment decision-making outside of the credit strategy. In turn, where necessary, the CCO may also erect information barriers around certain personnel that are not credit strategy access Persons which prohibits the sharing of information with anyone who is a credit strategy access person. The CCO may take additional steps from time to time as deemed necessary to ensure that information remains contained and monitored between the equity and credit strategy teams.

BROKERAGE PRACTICES [Item 12]

Broker-Dealer Selection

In selecting broker-dealers, PIM will generally seek the best combination of net price and execution for client accounts and may consider other factors, including: the broker's trading expertise, stature in the industry, execution ability, facilities, clearing capabilities and financial services offered, long-term relations with our firm, reliability and financial

responsibility, timing and size of order and execution, difficulty of execution, current market conditions and depth of the market. In order to measure the effectiveness of our trading strategy, we compare our executions against data compiled by an independent trading analytics provider. This data is reviewed regularly by our Best Execution Committee to ensure that our trading strategy is working, and the brokers are providing the best possible executions. PIM's experience in attempting to obtain best execution and in assessing it is further illustrated by the following:

PIM utilizes an analyst voting process to rate brokers and determine commission budget allocations. Votes are taken quarterly by the firm's investment team. Factors affecting such votes include the quality and quantity of research provided and assistance with access to management and management meetings. In addition, on an ongoing basis, PIM's Traders assess the execution capabilities of each broker who receives votes and budget allocations. If execution issues arise with any broker, the Traders may put the broker on a watch list or a restricted list. In other words, PIM generally considers the amount and nature of research, execution and other services provided by broker-dealers, as well as the extent to which such services are relied on, and attempts to allocate a portion of the brokerage business of its clients on the basis of that consideration. PIM endeavors to allocate sufficient commissions to broker-dealers that have provided them with research to ensure continued receipt of research it believes is useful to its overall research process and thus to client portfolios in general. Actual brokerage commissions received by a broker-dealer may be more or less than the suggested allocations.

Once orders have been generated, they are sent to our trading desk to be executed. Orders are generally entered with strict trading limits. These limits mean we are controlling price at the point of entry or exit into the market. Limit order prices are reviewed daily by our Portfolio Managers and Research Analysts and may be adjusted based upon current news or market conditions. To the extent that price and spread are significant factors in a best execution analysis, PIM's limit order trading strategy removes the price component from the equation.

PIM routes the majority of its equity orders to brokers for execution electronically (either directly to a broker or through various ECN/matching networks). These services may provide low-cost commissions as well as high quality executions and anonymity in the market.

PIM's priority is maintaining a fair and equitable trading process to achieve best execution for all clients where PIM has trading authority. For discretionary client accounts, a daily rotation schedule is managed by the trading desk (e.g., directed and non-directed brokerage). The Traders will rotate which orders are placed into the market for execution first in order to give all clients fair and equitable treatment. The Traders will have discretion to override the brokerage rotation where they feel it assists them in achieving best execution. PIM provides non-discretionary model delivery accounts with two options for trade notification. Model clients can either receive portfolio changes on a weekly schedule, or contemporaneous with model changes. As a result, model delivery clients may receive the trade instructions before, at the same time, or after our discretionary

portfolios. We believe both options are fair and equitable to model clients and fit within our obligation to be fair and equitable to all clients.

As mentioned above, PIM has a Best Execution Committee that meets quarterly to review the trading budget (which is completed by PIM's investment team), as well as how our commission dollars were spent during the previous quarter. Other responsibilities include:

- *preparation of guidelines for selection and review of brokers and broker allocations;
- *formulation and oversight of the firm's other brokerage and trade related policies, including the firm's Directed Brokerage & Soft Dollar; Principal, Agency & Cross Transactions; and Trade Allocation & Aggregation policies;
- *evaluation of execution quality information, and implementation of appropriate changes in firm policy based on such information;
- *periodic review of compensation paid to brokers over selected periods of time to determine if such compensation is reasonable in relation to the benefits received by PIM and its clients; and
- * counterparty evaluation for prime brokers, foreign exchange and participatory notes.

From time to time, clients may ask PIM for feedback or suggestions with regard to the use of certain broker-dealers and/or custodians. While PIM is never involved in the decision-making process with the client, we may offer some information based on our experiences with certain firms and we may make introductions if requested. PIM receives no economic benefit for any introduction it may make.

For PIM's credit strategy, the strategy's Portfolio Manager has the primary responsibility for PIM's efforts to obtain best execution. PIM's debt trading practices also receive oversight by the Head of Operations and the CCO and are subject to quarterly review by PIM's Best Execution Committee.

When selecting brokers with whom to execute debt trades, PIM will consider the full range and quality of a broker-dealer's services, including: (i) the value and quality of research provided, if any, (ii) the volume and quality of credit opportunities provided; (iii) liquidity and inventory in debt instruments; (iv) execution capability and level of trading expertise; (v) responsiveness to trading issues; and (vi) the ability to settle trades in a timely manner. All Brokers will be subject to the same due diligence process as currently employed by the equity trading team. Any changes to the current standards or guidelines with regard to the broker selection or approval process must be approved by the CCO.

Research and Other Soft Dollar Benefits

PIM does not obligate itself to seek the lowest transaction charge in all cases, except to the extent that it contributes to the overall goal of obtaining the best results for the client. A higher transaction charge on exchange and over-the-counter trades may be considered reasonable in light of the value of the brokerage and research services provided. These services are of the type described in Section 28(e) of the Securities Exchange Act of 1934 (“Section 28(e)”) and are designed to augment our internal research and investment-strategy capabilities.

PIM currently has soft dollar arrangements with brokerage firms that execute transactions on behalf of PIM's clients (the "Soft Dollar Brokers"). When PIM uses client brokerage commissions (or markups or markdowns) to obtain research or other products or services, PIM receives a benefit because it does not have to produce or pay for the research, products or services. PIM seeks to control this process by limiting the services it pays for using soft dollars to those that fall squarely within the safe harbor of Section 28(e) as more particularly described below.

Pursuant to PIM's soft dollar arrangements, the Soft Dollar Brokers pay for research products, systems and services, which include statistical corporate data, real time and historical securities quotes, valuation services, text retrieval, pricing and analytical services, trading systems and services, settlements systems, proxy voting, expert networks, portfolio management systems, and company lawsuit and legal liability data and analysis. The portion of such products and services that assist in the investment decision-making process and execution related products and services are paid for in soft dollars. The non-research portion is paid for by PIM in hard dollars. If research products or services received by PIM have a mixed use, PIM will allocate in good faith the cost of such service or product accordingly. Any such allocation may create a conflict of interest for PIM.

PIM maintains a soft dollar budget comprised of all accounts where PIM has trading and brokerage discretion. In specific situations client-imposed restrictions may require PIM to remove accounts from the budget, including restrictions driven by regulation or governmental requirement. This budget will be updated to reflect new soft dollar arrangements after the approval process has been completed and the appropriate invoices and other documentation have been received. PIM utilizes third-party software to assess the quality and value of research consumed in order to build and validate the overall budget. The software also allows PIM to track soft dollar payments relative to budget expectations. The estimated soft dollar budget will be set annually and reassessed quarterly by the firm's Best Execution Committee.

Soft dollar services may be used for any or all of PIM's clients' accounts and there may not be a direct correlation between the amount of brokerage commissions generated by a particular client and the indirect benefits received by the client. Products and services received by PIM or its affiliates from brokers in connection with brokerage services provided to certain client accounts may disproportionately benefit other client accounts based on the relative amounts of brokerage services provided to the client accounts, and

PIM does not seek to allocate soft dollar benefits proportionately to the soft dollar credits the accounts generate.

PIM endeavors to continuously monitor commission rates and keep commission costs appropriate to relevant market standards.

Concerning PIM's credit portfolios, the use of fixed income securities and OTC trading to generate soft dollars or commissions to be used to pay for research is subject to regulatory concerns. Only commissions from fixed income trades conducted on an agency basis will qualify for the Section 28(e) safe harbor. No commissions may be earned on any principal or OTC principal transactions. As such, any soft dollar or CSA arrangements contemplated for use by PIM's credit portfolio clients must be reviewed and approved by PIM's Best Execution Committee prior to entering into such arrangements to ensure they are appropriate and meet the requirements of PIM's credit policies and procedures.

Aggregation of Trades

PIM generally manages client accounts on a discretionary basis. Thus, PIM has the authority and responsibility to formulate investment strategy on clients' behalf, including deciding what securities to buy and sell, when to buy and sell, and in what amounts, in accordance with the client's account objective. PIM also typically has discretionary authority to execute trades through its trading desk.

Securities traded for the client accounts may, but are not required to, be aggregated with trades for other funds or accounts managed by the firm. When transactions are aggregated but it is not possible to receive the same price or execution on the entire volume of securities purchased or sold, the various prices may be averaged, and the Client accounts will be charged or credited with the average price. Thus, the effect of the aggregation may operate on some occasions to the disadvantage of the Client accounts.

In accordance with PIM's Trade Allocation & Aggregation Policy, all trade orders are allocated among managed account portfolios of the same or similar mandates at the time of trade creation / initial order preparation. Depending on the nature of the trade, the order creation may be done in an automated fashion using PIM's portfolio management system (e.g., if the trade is an increase or trim of an existing position) or manually by one of our Portfolio Management Associates (e.g., in connection with account level rebalancing or selling for taxable accounts where required to minimize taxes). Factors affecting order creation include availability of cash, existence of client-imposed trading restrictions or prohibitions, trading holds or halts imposed by a portfolio manager or a recognized exchange, and the tax status of the account. We may bunch or aggregate like orders or free business trades, but allocation is determined before any order is given to a broker.

Generally, brokers are selected and orders are entered with strict trading limits. Orders may be sent to multiple brokers, and as a result prices may vary for clients depending upon the execution prices at each broker. Prices for trades executed at different times on orders sent to one broker are averaged. When we have a large trade pending in the same security

that cannot be entered as one block trade based on client directed brokerage, we rotate the sequence in which the order is entered. If we receive partial executions of any block trade, the portion executed is generally allocated on a pro-rata basis; however, we may allocate a partially executed order differently in order to prevent a client from paying minimum ticket charges and being subject to higher total commission charges. Client directed brokerage or client-imposed broker restrictions may prevent certain orders from being aggregated with orders for other managed accounts resulting in different prices and commission rates than other client orders for the same security.

Further information about PIM's trade allocation practices can be found in our Trade Allocation & Aggregation Policy, which is available upon request.

REVIEW OF ACCOUNTS [Item 13]

Review of Accounts

Trading Review: Every morning, all pending trades are reviewed by a combination of PIM's Portfolio Managers, Research Analysts, Traders and Portfolio Management Associates. Strategic limits are set for that day's trading, and any items that may impact any security with a pending trade are discussed.

Account Review: Portfolio review meetings are generally held every two weeks, where Portfolio Managers, Traders, and Portfolio Management Associates review the current investment strategy and current holdings in each managed portfolio. Issues such as turnover, security weighting and sector weighting are all reviewed to be sure we are following both firm and client guidelines. Model changes, priority buys, sells and trims are set at these meetings. Our Portfolio Management Associates review and rebalance accounts periodically or as required by account or trading activity under the guidance of our Chief Executive Officer, Portfolio Managers and Co-Chief Investment Officers.

Client Reports

Quarterly Investment Management Reports: After the close of each full quarter, clients receive a written report of the valuation of each of the securities in their account (average cost, current market value, yield, and estimated annual income), the asset allocation in the account and PIM's investment strategy and market outlook. The report also includes performance data for the quarter and other relevant points in time. PIM also endeavors to accommodate client and investor reporting needs as reasonably requested.

CLIENT REFERRALS AND OTHER COMPENSATION [Item 14]

PIM does not currently engage in written referral agreements but may do so in accordance with PIM policies, provided appropriate disclosures and regulatory requirements are met. PIM previously entered into a written referral agreement with an unaffiliated entity, but no cash payments are currently made in connection with this agreement. Cash fees paid to the entity were based solely on a percentage of revenues collected. There is no additional fee to clients as a result of referral arrangements.

CUSTODY [Item 15]

To comply with the Advisers Act Custody Rule (i.e., Rule 206(4)-2) and to provide meaningful protection to investors, the private funds advised by PIM are subject to an annual financial statement audit by an independent public accountant registered with, and subject to regular inspection by, the Public Company Accounting Oversight Board. The audited financial statements are prepared in accordance with generally accepted accounting standards and are distributed to each private fund's investors within 120 days following the private fund's fiscal year-end. PIM also sends account statements to clients; clients are urged to compare the account statements from the qualified custodian with those received from PIM.

INVESTMENT DISCRETION [Item 16]

Accounts are generally managed on a discretionary basis pursuant to a grant of authority in the advisory agreement. Pursuant to this authority, PIM has the authority and responsibility to formulate investment strategy on behalf of clients, including deciding which securities to buy and sell, when to buy and sell, and in what amounts, in accordance with agreed-upon objectives. Each account is separately maintained consistent with PIM's investment approach and the client's investment goals. Clients may impose reasonable restrictions on the management of their accounts, subject to PIM's acceptance of these restrictions.

VOTING CLIENT SECURITIES [Item 17]

PIM's proxy voting process is generally the same for all client accounts managed by PIM where the client has given PIM the proxy voting authority. Each proxy that is to be voted by PIM is evaluated on the basis of what is in the best interests of the client. We deem the best interest of clients to be solely that which maximizes shareholder value. We will not subordinate the interests of our clients to any non-pecuniary interests nor will we promote non-pecuniary benefits or goals unrelated to our clients' financial interests. Where applicable, PIM also will consider any specific guidelines designated in writing by a client. Pending votes and proxies are forwarded to the Research Analyst who is responsible for

the company soliciting the proxy. The Research Analyst will then make his/her voting decision with respect to the proposals in the proxy. If such Research Analyst also beneficially owns shares of the company in his/her personal trading accounts, the Director of Research must sign off on the Research Analyst's votes for that company.

In evaluating proxy issues, PIM relies on information gathered as a result of the in-depth research and ongoing company analyses performed by our investment team in making buy, sell and hold decisions for our client portfolios. This process includes regular external engagements with senior management of portfolio companies. PIM may also consider information from other sources, including the management of a company presenting a proposal, shareholder groups, and independent proxy research services. Specifically, PIM has engaged an outside vendor, Institutional Shareholder Services ("ISS"), to help identify and flag factual issues of relevance and importance. PIM's Proxy Voting Committee has established written voting guidelines for a number of topics, including, but not limited to, the following: routine business; capital structure; audit services; compensation; board; shareholder rights; social/environmental; and anti-takeover. Generally, PIM will vote on such topics in accordance with these written voting guidelines, unless a particular proposal or the particular circumstances of a company suggest otherwise. The Proxy Voting Committee consists of representatives from Legal/Compliance, Research, and Operations, including PIM's Director of Research, its CCO, Head of Operations, and Head of ESG. The guidelines are reviewed and changed periodically in light of trends and developments in corporate governance.

If a Research Analyst desires to vote contrary to PIM's written voting guidelines on a particular issue, the Chief Investment Officers, Director of Research and/or the Portfolio Manager will determine how to vote based on the Research Analyst's recommendation and the long-term economic impact such vote will have on securities held in the applicable client accounts.

Under the written agreement between ISS and PIM, ISS provides a proxy analysis with research and a vote recommendation for each shareholder meeting of the companies in our client portfolios. They also vote, record and generate a voting activity report for our clients. PIM retains responsibility for instructing ISS how to vote, and we still apply our own proxy voting guidelines when voting as described above. PIM does not utilize pre-population or automated voting except as a safeguard mechanism designed to ensure that, in the unlikely event that we fail to submit vote instructions for a particular proxy, our shares will still get voted. Proxies for securities on loan through securities lending programs will generally not be voted, as PIM's clients (not PIM) control these securities lending decisions.

When voting a proxy for a security that PIM's Research team does not cover, we will vote in accordance with our voting guidelines (when they specifically cover the item being voted on) and defer to ISS's recommendations on all other items.

PIM's proxy voting policies and procedures also set forth our policies and procedures relating to the monitoring of corporate actions, and the detection and resolution of conflicts of interest with respect to proxies of portfolio companies. With respect to corporate

actions, PIM's policy is to work with the clients' custodians regarding pending corporate actions.

PIM's proxy voting policy specifically states that PIM shall not have any responsibility to initiate, consider or participate in any bankruptcy, class action or other litigation against or involving any issue of securities held in or formerly held in a client account or to advise or take any action on behalf of a client or former client with respect to any such actions or litigation.

With respect to conflicts, PIM has identified the following areas with potential conflicts of interest:

*Where PIM manages assets affiliated with a publicly traded company, and also holds that company's or an affiliated company's securities in one or more client portfolios.

*Where PIM manages the assets of a proponent of a shareholder proposal for a company whose securities are in one or more client portfolios.

*Where PIM has a client relationship with an individual who is a corporate director, or a candidate for a corporate directorship of a public company whose securities are in one or more client portfolios.

*Where a PIM officer, director or employee, or an immediate family member thereof is a corporate director, or a candidate for a corporate directorship of a public company whose securities are in one or more client portfolios. For purposes hereof, an immediate family member is generally defined as a spouse, child, parent, or sibling.

Our proxy voting policies provide for various methods of dealing with these and any other conflict scenarios subsequently identified by us.

PIM does not anticipate engaging in proxy voting for its credit portfolio clients, as debt investors do not typically have proxy voting rights. However, debt investments may have similar situations which require creditors to vote on corporate actions, reorgs, or other adjustments to the terms of the debt, covenants, or other aspects. There may also be situations in which debt can be called in whole or in part, similar to a tender offer, and the determination of whether to participate is up to the credit holders. In those circumstances, the credit portfolio management team will review the particular facts and make a determination as to what action is in the best interest of credit portfolio clients. Where PIM's client equity portfolios hold the same equity name, the decision shall be made in accordance with PIM's credit policies and procedures to ensure that it is made in the best interest of the credit portfolio clients.

Conflicts may also arise where proxies are issued or debt negotiations are conducted which would result in a disadvantage to the creditors, or the equity holders respectively, depending upon the actions taken. With respect to equity proxies, PIM will continue to vote all proxies in continuation with its current policies. With respect to credit holder

issues which might arise, the credit portfolio management team, Compliance, and the Director of Research will review the facts and circumstances, including the size of the equity position in PIM client portfolios, the impact to the investment of the proposal, and any other factors to ensure that PIM acts in the best interest of its clients and does not act in a manner or put forth action that may harm clients.

Clients may obtain a copy of PIM's current written proxy voting policies and procedures and/or a copy of the voting activity report generated by ISS for their account, by calling Steven Coffey at (212) 355-1600, or writing to him at Pzena Investment Management, LLC, 320 Park Avenue, 8th Floor, New York, New York, 10022, or at compliance@pzena.com.

FINANCIAL INFORMATION [Item 18]

PIM does not require or solicit prepayment of more than \$1,200 in fees per client six months or more in advance and, thus, has not included a balance sheet of its most recent fiscal year. PIM is not aware of any financial condition that is reasonably likely to impair its ability meet its contractual commitments to clients, nor has PIM been the subject of a bankruptcy petition at any time during the past ten years.

PRIVACY NOTICE

March 2024

Scope

Pzena Investment Management, LLC and its affiliates, including Pzena Investment Management, Ltd and Pzena Investment Management Europe Limited, (collectively, "PIM") are committed to protecting your privacy and that of your business and employees, while providing you, your clients, the organization you represent or your organization's clients, with the opportunity to receive our services.

Privacy Notice

Who are we?

Pzena Investment Management, LLC is an investment manager based in New York City with a strict focus on long-term classic value investing. The firm manages US, non-US, and global portfolios with a goal of long-term alpha generation. Since the firm's inception, Pzena has built a diverse, global client base of institutional and retail investors. Pzena also has business development/client service offices in Melbourne, Australia and London, England, and an operational and distribution office in Dublin, Ireland.

What Personal Data do we collect?

For the 12-month period prior to the date of this Privacy Policy, we explain here what categories of personal information we have collected, where we got it, why it is needed, and with whom we shared it:

Category of Personal Information Collected	Source of Information	Purpose for Collection	Categories of Recipients
Contact and Background information , such as your name, address, email address, telephone number, and job title	From you or from the platforms or advisers through whom you invest	To deliver investment management services or products to you, your clients, the organization you represent or your organization's clients; to inform you about our services, new	Service providers as may be necessary to provide services for you, your clients, the organization you represent or your organization's clients (e.g., brokers, custodians for your

		<p>developments in the equity markets and our marketing events; to perform the contract we have entered into with you or anticipate entering into with you; to comply with a legal obligation; for administrative or operational processes within PIM; and for direct marketing or other communication to you, your clients, the organization you represent or your organization's clients in respect of our services or products</p>	<p>accounts); service providers who assist us in administering and operating our business to meet client and regulatory expectations (e.g., disaster recovery backups, e-mail retention systems); service providers who assist us in communicating with and marketing to you (e.g., CRM systems, Microsoft Office 365); advisers (e.g., auditors, legal counsel, tax advisers and consultants) to PIM or our funds relating to the services we provide you, your clients, your employer or your employer's clients or relating to the operating of our business; and our affiliates, for the purpose of providing our services.</p>
Personal and financial data , such as bank account details, source of wealth information, accounts, and copies of passport or other official documentation	From you (through contracts, onboarding forms, subscription documents or other documents you may submit) or from the platforms or advisers through whom you invest	<p>To deliver investment management services or products to you, your clients, the organization you represent or your organization's clients; to perform the contract we have entered into with you or anticipate entering into with you; or to comply with a legal obligation.</p>	<p>Service providers as may be necessary to provide services for you, your clients, the organization you represent or your organization's clients (e.g., brokers, custodians for your accounts); advisers (e.g., auditors, legal counsel, tax advisers and consultants) to PIM or our funds relating to the services we provide</p>

			you, your clients, your employer or your employer's clients or relating to the operating of our business; and our affiliates, for the purpose of providing our services.
Information you choose to provide to us, including communications from you to PIM by letter, telephone, email or any other means of electronic or personal communication; if you are applying to work with us, we will collect information about your education and professional experience, professional licenses and certifications, we may also collect work product samples and references and their relevant contact information	From you or third parties including recruitment agencies, social media platforms (e.g., LinkedIn), business contacts or other referrers, universities, professional associations, and career sites.	To handle your requests and to contact you when necessary or requested, including to respond to your comments and questions and provide customer service; if you are applying to work with us or one of our affiliates, we will use your personal data to process your employment application.	Service providers who assist us in communicating with and marketing to you (e.g., CRM systems, Microsoft Office 365, Applicant Tracking systems); our affiliates, for the purpose of providing our services; advisers (e.g., auditors, legal counsel, tax advisers and consultants) to PIM or our funds relating to the services we provide you, your clients, your employer or your employer's clients or relating to the operating of our business.
Information automatically collected from your browser, such as information on what pages have been accessed and for how long, the country from which you access our site, and certain technical information regarding computer and operating systems,	From you; from our website technology's interaction with your browser or devices	To make sure our website technology works properly with your device and make sure you can see and use our website on the device you are using understand how people use our website so that we can improve site functionality; to track the activity of	Service providers who assist us in administering and operating our business to meet client and regulatory expectations (e.g., disaster recovery backups, e-mail retention systems); service providers to assist us in communicating with and marketing to you

such as the user's Internet protocol address, domain name and browser type, and information collected from cookies and web beacons		anonymous and known individuals coming to our website; to inform us what content is effective; and to track receipt of emails to gauge the effectiveness of our communications.	(e.g., CRM systems, Microsoft Office 365); and our affiliates, for the purpose of providing our services. PIM does not track people over time and across third party websites to provide targeted advertising.
Legal information , such as fraud checks or flags raised about your transactions, suspected crimes, complaints, claims and accidents	From you, the police, crime and fraud prevention agencies, the public, regulators, and your and our professional advisors and representatives	To protect you and our business against criminal activities and risks, make sure we understand and can meet our legal obligations to you and others and can defend ourselves	We may share your information with law enforcement agencies, regulatory or tax authorities and other governmental or public agencies or authorities in order to comply with our legal or regulatory obligations or at their request in furtherance of their objectives

In addition to the sharing of your personal information as described above, we also may disclose personal information we collect as follows:

In Connection with Business Transfers: In the event that a division or part or all of PIM is bought, sold or otherwise transferred, or is in the process of a potential transaction, customer information will likely be shared for evaluation purposes and included among the transferred business assets.

To Comply with Laws: PIM may also disclose specific information when such disclosure appears necessary to comply with the law, a subpoena or other litigation process or to protect the interests or safety of its visitors and customers, PIM employees or others. This may include transfers of information to law enforcement agencies; regulatory or tax authorities and other governmental or public agencies or authorities in order to comply with our legal or regulatory obligations or at their request in furtherance of their objectives.

With Third Parties: As noted above, PIM shares your personal data with certain categories of third parties, including service providers or advisers without first obtaining your consent. They may in turn use the services of their affiliates or service providers to process your personal data where necessary or appropriate. Where we share your personal data with such third parties, we require the recipients of that personal data to put in place adequate measures to protect it.

Pzena Cookie Statement

In order to enhance your website browsing experience, we place cookies onto your computer. Cookies are text files containing small amounts of information that are downloaded to your device when you visit a website. Cookies are useful because they allow us to customize and improve the users' experience of our website. We also use cookies and anonymous identifiers that enable our computer system to recognize you when you next visit our site. Standing alone, cookies do not identify you personally; they merely recognize your browser. We also use web beacons on our websites and in email communications. For example, we may place web beacons in marketing emails that notify us when you click on a link in the email that directs you to our website. Such technologies are used to operate and improve our website and email communications, and we may tie the information gathered to your personal information.

By using our website you agree that, unless you have set your device's browser to reject them, we may place the types of cookies set out below on your device, and use that data in accordance with this policy. PIM does not track people over time and across third party websites to provide targeted advertising and therefore does not respond to Do Not Track ("DNT") signals.

What types of cookies are used and what choices do you have?

Below is a list of the cookies that we use on our website.

Cookie Type	Description
Strictly Necessary Cookies	<p>These cookies are necessary for the website to work, and enable you to move around the website and use the services and features. Disabling these cookies will encumber performance and may make these services and features unavailable. Strictly Necessary Cookies are used to collect session ID and authentication data. They are "session" cookies, which expire when you close your browser session.</p>
Functional Cookies	<p>Functional Cookies allow the website to help maintain your session and remember the choices you made in order to provide functionality for your benefit.</p> <ul style="list-style-type: none">For example, functional "session" cookies allow the website to remember settings specific to you. These are temporary and are erased when you close your browser at the end of your session.Functional Cookies also include persistent cookies that are used to remember your preferences. Functional "persistent" cookies remain on your hard drive until you erase them or they expire.
Analytic Cookies	<p>Analytic Cookies are used to gather statistics about the use of the website in order to improve the performance and design of our services. For these purposes, Analytic Cookies collect information about your device type, operating system type, browser type,</p>

Cookie Type	Description
	<p>domain, other system settings, IP address, referring URLs, information on actions taken on the website and the dates and times of your visits, as well as the country and time zone in which your device is located. For example, Google Analytics obtains information through these cookies. For more information, please visit the links below:</p> <p>https://support.google.com/analytics/answer/6004245 and www.google.com/policies/privacy/partners/</p>
Third Party Cookies	<p>We partner with third parties to provide you with connections to certain social networks (such as, Facebook, Twitter and LinkedIn) and to provide you with additional features (such as, YouTube and Vimeo). By using the website or engaging with third-party plugins and widgets, such third parties may place "session" or "persistent" cookies, or similar technologies, on your browser.</p>

Changing your cookie preferences

The "Help" menu in the toolbar of most web browsers will tell you how to change your browser's cookie settings, including how to have the browser notify you when you receive a new cookie and how to disable cookies altogether. If you would like to find out more about cookies in general and how to manage them, please visit www.allaboutcookies.org.

For California Residents

Your California Privacy Rights

California residents who provide personal information in obtaining products or services for personal, family, or household use are entitled to request and obtain from us once a calendar year information about the customer information we shared with third parties for their own direct marketing purposes, including the categories of information and the names and addresses of those businesses with which we have shared such information. As discussed elsewhere in this Privacy Policy, we do not currently share the personal information of California residents with third parties for their own direct marketing purposes. However, if you have further questions about our privacy practices and compliance with California law, please contact us as explained below.

If you are a California resident, the California Consumer Privacy Act and the California Privacy Rights Act provides you with the following rights with respect to your personal information:

- The right to request to know the categories or specific pieces of personal information we have collected, used, disclosed and sold about you. To submit a request to know, you may call us at 833-932-1492 or visit <https://www.pzena.com/ccpa/>. You also may designate an authorized agent to make a request for access on your behalf on our website at <https://www.pzena.com/ccpa/>.
- The right to request that we delete any personal information we have collected about you. To submit a request for deletion, you may call us at 833-932-1492 or visit

<https://www.pzena.com/ccpa/>. You also may designate an authorized agent to make a request for deletion on your behalf on our website at <https://www.pzena.com/ccpa/>.

When you exercise these rights and submit a request to us, we will verify your identity by asking you to log in to your account if you have one with us. Or if you do not, we may ask for your email address or other proof of identity. PIM also may use a third-party verification provider to verify your identity.

The fact that you have elected to exercise these rights will have no adverse effect on the price and quality of our services. PIM does not sell your personal information to third parties.

Children's Privacy. PIM does not knowingly solicit or collect personally identifiable information from children under the age of thirteen (13) without verifiable parental consent. If PIM learns that a child under the age of thirteen (13) has submitted personally identifiable information online without parental consent, PIM will take all reasonable measures to delete such information from our databases and to not use such information for any purpose (except where necessary to protect the safety of the child or others as required or allowed by law). If you become aware of any personally identifiable information we have collected from children under thirteen (13), please contact us at Privacy@pzena.com.

Minors under 18 years of age may have the Personal Information that they provide to us deleted by sending an email requesting deletion to Privacy@pzena.com. Please note that, while we make reasonable efforts to comply with such requests, deletion of your personal information does not ensure complete and comprehensive removal of that data from all systems.

Questions

If you have questions regarding this Privacy Notice or to request this Privacy Notice in another form, please email us at Privacy@pzena.com.

For UK and European Individuals

This section of the privacy notice covers all personal data collected by PIM, the protection of which is governed by the European Union General Data Protection Regulation ("GDPR"). This privacy notice also covers all personal data collected by PIM, the protection of which is governed by the UK Data Protection Act 2018 and/or the GDPR as retained in Ireland.

PIM is the controller with respect to the personal data described below. Pzena Investment Management, Ltd. of 34-37 Liverpool Street, London EC2M 7PP is our representative in the UK for UK data protection purposes. Pzena Investment Management Europe Limited. of Fitzwilliam Hall, Fitzwilliam Place, Dublin 2, Dublin, D02 T292 is our representative in Ireland for European data protection purposes.

Our Chief Information Officer ("CIO") who is responsible for our data protection and other PIM employees dealing with data protection questions and requests can be contacted directly by e-mail at privacy@pzena.com or by phone at +1 (347) 643-0915.

Our lawful basis for processing of the personal data will depend on the purpose or purposes of why we collected and need to use your information, however under EU and UK data protection laws, in almost all cases the lawful basis will be:

- to perform the contract we have entered into with you or anticipate entering into with you;
- to comply with a legal obligation; or
- if we (or a third party) have a legitimate interest which is not overridden by your interests or fundamental rights and freedoms. Such legitimate interests will be:
 - providing of investment management services, and fulfilling our obligations to you, your clients, the organization you represent or your organization's clients;
 - administrative or operational processes within PIM and direct marketing or other communication to you, your clients, the organization you represent or your organization's clients in respect of our services or products;
 - to operate and improve our business and to help maintain quality; or
 - to comply with a legal obligation not set out under the laws of EU member states and / or the UK, or under contract, including for the establishment, exercise or defense of legal claims

International Transfers

Your personal data will be sent to and stored by us and third parties in countries outside the country in which you are located and outside of the European Economic Area ("EEA") and / or the UK. The nature of our business means it is necessary for us to send your personal data outside the EEA and / or the UK to properly provide our services to you, your clients, the organization you represent, or your organization's clients. This occurs because our business and the third parties we may use have operations in the United States and countries across the world. We will always ensure that there is a legal basis and a relevant safeguard method for such data transfer so that your personal data is treated in a manner that is consistent with, and respects the EU and / or UK laws and other applicable laws and regulations on data protection, including by entering into appropriate data transfer agreements with third party recipients of your personal information incorporating standard contractual clauses governing data transfer contracts which have been approved by the European Commission and / or approved by the UK government (as relevant). Please contact PIM at Privacy@pzena.com, if you would like a copy of the model clauses.

Disclosure

PIM will pass on your personal data to third parties without first obtaining your consent. The following third parties may receive your personal data for the following purpose(s) as part of the processing activities:

- Processors or sub-processors as may be necessary to provide services for you, your clients, the organization you represent or your organization's clients (e.g., brokers, custodians for your accounts).
- Processors or sub-processors to assist us in administering and operating our business to meet client and regulatory expectations (e.g., disaster recovery backups, e-mail retention systems).
- Processors or sub-processors to assist us in communicating with and marketing to you (e.g., CRM systems, Microsoft Office 365).

- Advisers (e.g., auditors, legal counsel and tax advisers) to PIM or our funds relating to the services we provide you, your clients, your employer or your employer's clients.
- Our affiliates, for the purpose of providing our services.

They may in turn use the services of their affiliates or service providers to process your personal data where necessary or appropriate. Where we share your personal data with such third parties, we require the recipients of that personal data to put in place adequate measures to protect it.

Retention period

PIM will retain personal data for as long as it is necessary for the purpose it is being processed for and will store the personal data for a sufficient period to handle or respond to any complaints, queries or concerns relating to such agreement or to satisfy any legal, regulatory, accounting or reporting requirements. The personal data may also be retained so that we can continue to improve our clients' experience with us.

We will periodically review the personal data we hold in accordance with PIM's policies. If there is no longer a legal or business need for the personal data to be retained, we delete it securely, or, in some cases, anonymize it.

Your rights as a data subject

At any point while we are in possession of or processing your personal data, you, the data subject, have the following rights:

- Right of access – you have the right to request a copy of the information that we hold about you.
- Right of rectification – you have a right to correct data that we hold about you that is inaccurate or incomplete.
- Right to be forgotten – in certain circumstances you can ask for the data we hold about you to be erased from our records.
- Right to restriction of processing – where certain conditions apply to have a right to restrict the processing.
- Right of portability – you have the right to have the data we hold about you transferred to another organization.
- Right to object – you have the right to object to certain types of processing such as direct marketing, and where we rely on legitimate interests as the basis for processing. These rights may be limited in some circumstances, for example where we are required to process your personal data by law.
- Right to object to automated processing, including profiling – you also have the right not to be subject to the legal effects of automated processing or profiling.
- Right to judicial review: in the event that PIM refuses your request under rights of access, we will provide you with a reason as to why. You have the right to complain as outlined in the clause below.

All of the above requests will be forwarded on should there be a third party involved (as stated above) in the processing of your personal data.

Complaints

In the event that you wish to make a complaint about how your personal data is being processed by PIM (or third parties as described above), or how your complaint has been handled, you have the right to lodge a complaint with PIM's data protection representative, and/or the CIO, or directly with the relevant data protection supervisory authority (in the United Kingdom, the Information Commissioner's Office and in Ireland, the Data Protection Commission). A list of data protection authorities is available at https://edpb.europa.eu/about-edpb/board/members_en).

Proxy Voting

Revised July 2024

INTRODUCTION

As a registered investment adviser and fiduciary, Pzena Investment Management, LLC (“PIM”) exercises our responsibility, where applicable, to vote in a manner that, in our judgement, is solely in the client’s best interest and will maximize long-term shareholder value. The following policies and procedures have been established to ensure decision making is consistent with PIM’s fiduciary responsibilities and applicable regulations under the Investment Company Act, Advisers Act and ERISA.

GENERAL APPROACH

Each proxy that comes to PIM to be voted shall be evaluated per the prudent process described below, in terms of what is in the best interest of our clients. We deem the best interest of clients to be solely that which maximizes shareholder value and yields the best economic results (e.g., higher stock prices, long-term financial health, and stability). We will not subordinate the interests of our clients to any non-pecuniary interests nor will we promote non-pecuniary benefits or goals unrelated to our clients’ long-term financial interests.

PIM’s standard Investment Advisory Agreement provides that until notified by the client to the contrary, PIM shall have the right to vote all proxies for securities held in that client’s account. Where PIM has voting responsibility on behalf of a client, and absent any client-specific instructions, we generally follow the Voting Guidelines (“Guidelines”) set forth below. These Guidelines, however, are not intended as rigid rules and do not cover all possible proxy topics. Each proxy issue will be considered individually and PIM reserves the right to evaluate each proxy vote on a case-by-case basis, as long as voting decisions reflect what is in the best interest of our clients.

To the extent that, in voting proxies for an account subject to ERISA, PIM determines that ERISA would require voting a proxy in a manner different from these Guidelines, PIM may override these Guidelines as necessary in order to comply with ERISA. Additionally, because clients, including ERISA clients, do not pay any additional fees or expenses specifically related to our proxy voting, there is not a need to consider the costs related to proxy voting impacting the value of an investment or investment performance.

In those instances where PIM does not have proxy voting responsibility, we shall forward any proxy materials to the client or to such other person as the client designates.

Proxy Voting Limitations

While, subject to the considerations discussed above, PIM uses our best efforts to vote proxies, in certain circumstances it may be impractical or impossible to do so. Such instances include but are not limited to share

blocking, securities lending, if PIM concludes that abstention is in our clients' economic interests and/or the value of the portfolio holding is indeterminable or insignificant.

VOTING GUIDELINES

The following Guidelines summarize PIM's positions on various issues of concern to investors and give an indication of how portfolio securities generally will be voted. These Guidelines are not exhaustive and do not cover all potential voting issues or the intricacies that may surround individual proxy votes. Actual proxy votes may also differ from the Guidelines presented, as we will evaluate each individual proxy on its own merit.,

It is also worth noting that PIM considers the reputation, experience and competence of a company's management and board when it researches and evaluates the merits of investing in a particular security. In general, PIM has confidence in the abilities and motives of the board and management of the companies in which we invest.

1) ROUTINE BUSINESS

PIM will typically vote in accordance with the board and management on the items below and other routine issues when adequate information on the proposal is provided.

- i. Change in date and place of annual meeting (if not associated with a takeover);
- ii. Change in company name;
- iii. Approval of financial statements;
- iv. Reincorporation (unless to prevent takeover attempts);
- v. Stock splits; or
- vi. Amend bylaws/articles of association to bring in line with changes in local laws and regulations.

PIM will oppose vague, overly broad, open-ended, or general "other business" proposals for which insufficient detail or explanation is provided or risks or consequences of a vote in favor cannot be ascertained.

2) CAPITAL STRUCTURE

Stock Issuance

PIM will consider on a case-by-case basis all proposals to increase the issuance of common stock, considering company-specific factors that include, at a minimum:

- i. Past board performance (use of authorized shares during the prior three years);
- ii. Stated purpose for the increase;
- iii. Risks to shareholders of not approving the request; or
- iv. Potential dilutive impact.

PIM will generally vote for such proposals (without preemptive rights) up to a maximum of 20% more than currently issued capital over a specified period, while taking into account management's prior use

of these preemptive rights. PIM will, however, vote against such proposals if restrictions on discounts are inadequate (i.e., discount limit is not stated or is in excess of 10% of the market price) and/or the limit on the number of times the mandate may be refreshed is not in line with local market practices.

3) AUDIT SERVICES

PIM is likely to support the approval of auditors unless,

- i. Independence is compromised;
- ii. Non-audit ("other") fees are greater than the sum of the audit fees¹, audit-related fees² and permissible tax fees³;
- iii. There is reason to believe the independent auditor has rendered an opinion which is neither accurate nor indicative of the company's financial position; or
- iv. Serious concerns about accounting practices are identified, such as fraud, misapplication of Generally Accepted Accounting Principles ("GAAP") and material weaknesses identified in Section 404 disclosures of the Sarbanes-Oxley Act of 2002.

PIM will also apply a case-by-case assessment to shareholder proposals asking companies to prohibit their auditors from engaging in non-audit services (or capping the level of non-audit services), taking into account whether the non-audit fees are excessive (per the formula above) and whether the company has policies and procedures in place to limit non-audit services or otherwise prevent conflicts of interest.

4) COMPENSATION

PIM supports reasonable incentive programs designed to attract and retain key talent. PIM typically supports management's discretion to set compensation for executive officers, so long as the plan aligns management and shareholder interests. PIM evaluates each plan in detail to assess whether the plan provides adequate incentive to reward long-term performance and the impact on shareholder value (e.g. dilution).

Say on Pay

PIM prefers a shareholder vote on compensation plans to provide a mechanism to register discontent with the plan itself or management team performance. As long as such proposals are non-binding and worded in a generic manner (unrestrictive to actual company plans), PIM will support them. In evaluating these proposals, PIM will generally consider, at minimum: company performance, pay practices relative to industry peers, potentially problematic pay practices and/or past unresponsive behavior.

Circumstances where PIM may oppose these proposals include:

¹ Audit fees shall mean fees for statutory audits, comfort letters, attest services, consents, and review of filings with the SEC

² Audit-related fees shall mean fees for employee benefit plan audits, due diligence related to M&A, audits in connection with acquisitions, internal control reviews, consultation on financial accounting and reporting standards

³ Tax fees shall mean fees for tax compliance (tax returns, claims for refunds and tax payment planning) and tax consultation and planning (assistance with tax audits and appeals, tax advice relating to M&A, employee benefit plans and requests for rulings or technical advice from taxing authorities)

- i. Restricts the company's ability to hire new, suitable management; or
- ii. Restricts an otherwise responsible management team in some other way harmful to the company.

Pay for Performance

PIM will generally support plans under which 50% or more of the shares awarded to top executives are tied to performance goals. Maintaining appropriate pay-for-performance alignment means executive pay practices must be designed to attract, retain, and appropriately motivate the key employees who drive shareholder value creation over the long term. Our evaluation of this issue will take into consideration, among other factors, the link between pay and performance; the mix between fixed and variable pay; performance goals; equity-based plan costs; and dilution.

Incentive Options

PIM is generally supportive of incentive options that provide the appropriate degree of pay-for-performance alignment (as per the above) and are therefore in shareholder best interest. PIM will vote on a case-by-case basis depending on certain plan features and equity grant practices, where positive factors may counterbalance negative factors, and vice versa.

However, the following would generally cause PIM to vote against a management incentive arrangement:

- i. The proposed plan is in excess of 10% of shares;
- ii. Company has issued 3% or more of outstanding shares in a single year in the recent past;
- iii. The new plan replaces an existing plan before the existing plan's termination date and some other terms of the new plan are likely to be adverse to the maximization of investment returns; or
- iv. The proposed plan resets options, or similarly compensates executives, for declines in a company's stock price. This includes circumstances where a plan calls for exchanging a lower number of options with lower strike prices for an existing larger volume of options with high strike prices, even when the option valuations might be considered the same total value. However, this would not include instances where such a plan seeks to retain key executives who have been undercompensated in the past.

Golden Parachutes / Severance Agreements

PIM will vote on a case-by-case basis, considering at minimum existing change-in-control arrangements maintained with named executive officers and new or extended arrangements.

PIM will generally vote against such proposals if:

- i. The proposed arrangement is excessive or not reasonable in light of similar arrangements for other executives in the company or in the company's industry;

- ii. The proposed parachute or severance arrangement is considerably more financially attractive than continued employment. Although PIM will apply a case-by-case analysis of this issue, as a general rule, a proposed severance arrangement which is three or more times greater than the affected executive's then-current compensation shall be voted against; or
- iii. The triggering mechanism in the proposed arrangement is solely within the recipient's control (e.g., resignation).

Tax Deductibility

Votes to amend existing plans to increase shares reserved and to qualify for tax deductibility under the provisions of Section 162(m) should be considered on a case-by-case basis, considering the overall impact of the amendment(s).

Pay Peer Groups

PIM prefers that compensation peer groups are based on the industry, not size, revenue or balance sheet.

5) BOARD

Director Elections

PIM generally will evaluate director nominees individually and as a group based on our assessment of record and reputation, business knowledge and background, shareholder value mindedness, accessibility, corporate governance abilities, time commitment, attention and awareness, independence, and character. PIM will apply a case-by-case approach to determine whether to vote for or against directors nominated by outside parties whose interests may conflict with our interests as shareholders, regardless of whether management agrees with the nomination.

Board Independence

PIM will generally withhold votes from or vote against any insiders on audit, compensation or nominating committees, and from any insiders and affiliated outsiders on boards that are not at least majority independent. PIM also prefers companies to have compensation and audit committees composed of entirely independent directors.

PIM may vote in favor of any such directors in exceptional circumstances where the company has shown significant improvement.

Board Size

PIM believes there is no optimal size or composition that fits every company. However, PIM prefers that the number of directors cannot be altered significantly without shareholder approval; otherwise, potentially allowing the size of the board to be used as an anti-takeover defense.

Board Tenure

PIM believes that any restrictions on a director's tenure, such as a mandatory retirement age or length of service limits, could harm shareholder interests by forcing experienced and knowledgeable directors off the board. However, PIM prefers that boards do not have more than 50% of members serving for longer than ten years to avoid board entrenchment and 'group-think'.

Chairman/CEO

PIM will evaluate and vote proposals to separate the Chairman and CEO positions in a company on a case-by-case basis based on our assessment of the strength of the company's governing structure, the independence of the board and compliance with NYSE and NASDAQ listing requirements, among other factors. When the positions of Chairman and CEO are combined, PIM prefers that the company has a lead independent director to provide some independent oversight.

Cumulative Voting

PIM will generally vote against proposals to establish cumulative voting, as this leads to misaligned voting and economic interest in a company. PIM will, however, vote in favor of proposals for cumulative voting at controlled companies where insider voting power is greater than 50%.

Director Over-Boarding

PIM will vote such proposals on a case-by-case basis but prefers that directors do not sit on more than three additional boards. In evaluating these proposals PIM will consider, at minimum, management tenure, director business expertise and director performance.

Classified Boards

PIM generally opposes classified boards because this makes a change in board control more difficult and hence may reduce the accountability of the board to shareholders. However, these proposals will be evaluated on a case-by-case basis and will consider, at minimum, company and director performance.

Board Diversity

PIM is generally supportive of a diverse board (age, race, gender etc.) that is representative of its customers and stakeholders. That said, PIM does not believe in board quotas or any restrictions on

director tenure that could harm shareholder interests by preventing qualified board candidates from being nominated or forcing experienced or knowledgeable directors off the board.

6) SHAREHOLDER RIGHTS

In general PIM does not support any proposals designed to limit shareholder rights; below we have outlined some of the issues we consider most important.

Special Meetings

PIM generally supports proposals enabling shareholders to call a special meeting of a company so long as at least a 15% threshold with a one-year holding period is necessary for shareholders to do so. However, on a case-by-case basis, a 10% threshold may be deemed more appropriate should particular circumstances warrant; for example, in instances where executive compensation or governance has been an issue for a company.

One Share, One Vote

PIM is generally opposed to proposals to create dual-class capitalization structures as these provide disparate voting rights to different groups of shareholders with similar economic investments. However, PIM will review proposals to eliminate a dual-class structure on a case-by-case basis, considering, at minimum, management's prior record.

Supermajority

PIM does not support supermajority voting provisions with respect to corporate governance issues unless it would be in the best interest of shareholders. In general, vesting a minority with veto power over shareholder decisions could deter tender offers and hence adversely affect shareholder value.

Proxy Access

PIM will assess these proposals on a case-by-case basis, but generally supports proxy access proposals that include an ownership level and holding period of at least 3% for three years or 10% for one year.

7) SOCIAL/ENVIRONMENTAL

PIM will consider environmental and social proposals on their own merits and make a case-by-case assessment. PIM will consider supporting proposals that address material issues if we believe they will protect and/or enhance the long-term value of the company.

While PIM is generally supportive of resolutions seeking additional ESG disclosures, such proposals will be evaluated on a case-by-case basis, taking into consideration whether the requested disclosure is material, incremental and of reasonable cost to the business.

8) ANTI-TAKEOVER

PIM generally supports anti-takeover measures that are in the best interest of shareholders and does not support anti-takeover measures such as poison pills that entrench management and/or thwart maximization of investment returns.

ROLES & RESPONSIBILITIES

Role of ISS

PIM has engaged Institutional Shareholder Services (“ISS”) to provide a proxy analysis with research and a vote recommendation for each shareholder meeting of the companies in our client portfolios. In engaging and continuing to engage ISS, PIM has determined that, where applicable, ISS proxy voting guidelines are consistent with ERISA’s fiduciary duties including that the votes are made in the best interest of our clients, focus on yielding the best economic results for our clients. ISS also votes, records and generates a voting activity report for our clients, and assists us with recordkeeping and the mechanics of voting. In no circumstance shall ISS have the authority to vote proxies except in accordance with standing or specific instructions given to it by PIM. PIM retains responsibility for instructing ISS how to vote, and we still apply our own Guidelines as set forth herein. PIM does not utilize pre-population or automated voting except as a safeguard mechanism designed to ensure that, in the unlikely event that we fail to submit vote instructions for a particular proxy, our shares will still get voted. If PIM does not issue instructions for a particular vote, the default is for ISS to mark the ballots in accordance with our Guidelines (when they specifically cover the item being voted on), and to refer all other items back to PIM for instruction (when there is no PIM policy covering the vote).

When voting a proxy for a security that PIM’s Research team does not cover, we will vote in accordance with our Guidelines (when they specifically cover the item being voted on) and defer to ISS’s recommendations on all other items.

PIM has also engaged ISS to assist in meeting the annual Form N-PX filing requirement for Advisers finalized by the SEC to take effect for the 2024 reporting cycle (see Regulatory Reporting).

Periodically, PIM’s Vendor Management Committee conducts a due diligence review of ISS, through which it reviews and evaluates certain key policies and procedures submitted to us by ISS. PIM’s Proxy Coordinator reconciles votable holdings against the ISS portal sharecount before each meeting. PIM also samples and reviews proxy votes when testing our Proxy Voting Policy, as part of our regular compliance testing procedures. Further, PIM reviews ISS’ procedures for receiving additional information from issuers after a proxy has been sent, incorporating that information into its recommendations, and sending that information and/or updated recommendations to PIM.

Role of Analyst

The analyst who is responsible for covering the company also votes the associated proxies since they have first-hand in-depth knowledge of the company. In evaluating proxy issues, the analyst will utilize a variety of sources to help come to a decision:

- i. Information gathered through in-depth research and ongoing company analyses performed by our investment team in making buy, sell and hold decisions for our client portfolios. This process includes regular external engagements with senior management of portfolio companies and internal discussions with Portfolio Managers (“PMs”) and the Chief Investment Officer (“CIO”), as needed;
- ii. ISS reports to help identify and flag factual issues of relevance and importance;
- iii. Information from other sources, including the management of a company presenting a proposal, shareholder groups, and other independent proxy research services; and/or
- iv. Where applicable, any specific guidelines designated in writing by a client.

Proxy Voting Committee

To help make sure that PIM votes client proxies in accordance with our fiduciary obligation to maximize shareholder value, we have established a Proxy Voting Committee (“the Committee”) which is responsible for overseeing the Guidelines. The Committee consists of representatives from Legal, Compliance, Research, and Operations, including our Chief Compliance Officer (“CCO”), Director of Research (“DOR”), and at least one PM (who represents the interests of all PIM’s portfolio managers and is responsible for obtaining and expressing their opinions at committee meetings). The Committee will meet at least once annually and as often as necessary to oversee our approach to proxy voting.

The DOR is responsible for monitoring the analyst’s compliance with the Guidelines, the CCO is responsible for monitoring overall compliance with these procedures and an internally-designated “Proxy Coordinator” is responsible for day-to-day proxy voting activities.

CONFLICTS OF INTEREST

PIM is sensitive to conflicts of interest that may arise in the proxy voting process. PIM believes that application of the Guidelines should, in most cases, adequately address any potential conflicts of interest. However, if an actual or potential material conflict of interest has been identified, PIM has put in place a variety of different mitigation strategies as outlined below.

A potential material conflict of interest could exist in the following situations:

- i. PIM manages any pension or other assets affiliated with a publicly traded company, and also holds that company’s or an affiliated company’s securities in one or more client portfolios;
- ii. PIM has a client relationship with an individual who is a corporate director, or a candidate for a corporate directorship of a public company whose securities are in one or more client portfolios; or
- iii. A PIM officer, director or employee, or an immediate family member thereof is a corporate director, or a candidate for a corporate directorship of a public company whose securities are in one or more client portfolios. For purposes hereof, an immediate family member is generally defined as a spouse, child, parent, or sibling.

If a potential material conflict of interest exists, the following procedures will be followed:

- i. If our proposed vote is consistent with the Guidelines, above, we will vote in accordance with our proposed vote;
- ii. If our proposed vote is inconsistent with or not covered by our Guidelines, but is consistent with the recommendations of ISS, we will vote in accordance with ISS recommendations; and
- iii. If our proposed vote is inconsistent with or not covered by our Guidelines, and is inconsistent with the recommendations of ISS, the CCO and the DOR (or their respective designees) (the “Conflicts Committee”) will review the potential conflict and determine whether the potential conflict is material.
 - a. If the Conflicts Committee determines that the potential conflict is not material, we will vote in accordance with the proposed vote.
 - b. If the Conflicts Committee determines the potential conflict is material, the Conflicts Committee will review the proposed vote, the analysis and rationale for the vote recommendation, the recommendations of ISS and any other information the Conflicts Committee may deem necessary in order to determine whether the proposed vote is reasonable and not influenced by any material conflicts of interest. The Conflicts Committee may seek to interview the research analysts or portfolio managers or any other party it may deem necessary for making its determination.
 - i. If the Conflicts Committee determines the proposed vote is reasonable and not influenced by any conflicts of interest, we will vote in accordance with our proposed vote.
 - ii. If the Conflicts Committee cannot determine that the proposed vote is reasonable and not influenced by any conflict of interest, the Conflicts Committee will determine the best course of action in the best interest of the clients, which may include deferring to the ISS recommendation or notifying each client who holds the relevant securities of the potential conflict, to seek such client’s voting instruction.

On an annual basis, we will review and assess the conflicts policies and Code of Conduct that ISS posts on its website for sufficiency in addressing potential conflict of interest, self-dealing and improper influence issues that may affect voting recommendations by ISS. PIM will also periodically review samples of ISS’ recommendations for voting proxies, after the vote has occurred, to ensure that ISS’ recommendations are consistent with ISS’ proxy voting guidelines, as applicable. PIM’s analysts also incorporate information regarding ISS’ potential conflicts of interest into their process when evaluating and voting proxies, and on an annual basis, our DOR reviews an updated list of ISS’ significant client relationships.

Other Situations

Client Conflict

Where PIM manages the assets of a proponent of a shareholder proposal for a company whose securities are in one or more client portfolios, the following guidance should be followed:

- i. The identity of the proponent of a shareholder proposal shall not be given any substantive weight (either positive or negative) and shall not otherwise influence an analyst’s determination whether a vote for or against a proposal is in the best interest of our clients.

- ii. Where PIM determines that it is in the best interest of our clients to vote against that proposal, a designated member of PIM's client service team will notify the client-proponent and give that client the option to direct PIM in writing to vote the client's proxy differently than it is voting the proxies of our other clients.
- iii. If the proponent of a shareholder proposal is a PIM client whose assets under management with PIM constitute 30% or more of PIM's total assets under management, and PIM has determined that it is in the best interest of our clients to vote for that proposal, PIM will disclose its intention to vote for such proposal to each additional client who also holds the securities of the company soliciting the vote on such proposal and for whom PIM has authority to vote proxies. If a client does not object to the vote within three business days of delivery of such disclosure, PIM will be free to vote such client's proxy as stated in such disclosure.

Analyst Conflict

If the analyst voting the proxy also beneficially owns shares of the company in his/her personal trading accounts, they must notify the Proxy Coordinator and the DOR must sign off on the analyst's votes for that company. It is the responsibility of each analyst to disclose such personal interest and obtain such approval. Any other owner, partner, officer, director, or employee of PIM who has a personal or financial interest in the outcome of the vote is prohibited from attempting to influence the proxy voting decision of PIM personnel responsible for voting client securities.

VOTING PROCEDURES

If an analyst desires to vote contrary to the Guidelines set forth in this proxy voting policy or the written proxy voting policy designated by a specific client, the analyst will discuss the vote with the CIO, and/or DOR and/or a PM for the strategy in which the security is held. The CIO, DOR and/or the PM, shall, in turn, determine how to vote the proxy based on the analyst's recommendation and the long-term economic impact such vote will have on the securities held in client portfolios. If the CIO, DOR and/or the PM agree with the analyst's recommendation and determine that a contrary vote is advisable the analyst will provide written documentation of the reasons for the vote.

Vote Processing

It is understood that PIM's and ISS' ability to commence voting proxies for new or transferred accounts is dependent upon the actions of custodian's and banks in updating their records and forwarding proxies. PIM will not be liable for any action or inaction by any Custodian or bank with respect to proxy ballots and voting.

Client Communication

PIM will include a copy of these proxy voting policies and procedures, as they may be amended from time to time, in each new account pack sent to prospective clients. We also will update our ADV disclosures regarding these policies and procedures to reflect any material additions or other changes to them, as needed. Such ADV disclosures will include an explanation of how to request copies of these policies and procedures as well as any other disclosures required by Rule 206(4)-6 of the Advisers Act.

Return Proxies

The CCO, Proxy Coordinator, or designee shall send or cause to be sent (or otherwise communicate) all votes to the company or companies soliciting the proxies within the applicable time period designated for return of such votes, unless not possible to do so due to late receipt or other exigent circumstances.

CORPORATE ACTIONS

PIM is responsible for monitoring both mandatory (e.g. calls, cash dividends, exchanges, mergers, spin-offs, stock dividends and stock splits) and voluntary (e.g. rights offerings, exchange offerings, and tender offers) corporate actions. Operations personnel will ensure that all corporate actions received are promptly reviewed and recorded in PIM's portfolio accounting system, and properly executed by the custodian banks for all eligible portfolios. On a daily basis, a file of PIM's security database is sent to a third-party service, Vantage, via an automated upload which then provides corporate action information for securities included in the file. This information is received and acted upon by the Operations personnel responsible for corporate action processing. In addition, PIM receives details on voluntary and mandatory corporate actions from the custodian banks via email or online system and all available data is used to properly understand each corporate event.

Voluntary Corporate Actions

The Portfolio Management team is responsible for providing guidance to Operations on the course of action to be taken for each voluntary corporate action received in accordance with the standards described above for proxy voting, including, but not limited to, acting in the best interest of clients to maximize long-term shareholder value and yield the best economic results. In some instances, if consistent with such standards, the Portfolio Management team may maintain standing instructions on particular event types. As appropriate, Legal and Compliance may be consulted to determine whether certain clients may participate in certain corporate actions. Operations personnel will then notify each custodian bank, either through an online interface, via email, or with a signed faxed document of the election selected. Once all necessary information is received and the corporate action has been vetted, the event is processed in the portfolio accounting system and filed electronically. A log of holdings information related to the corporate action is maintained for each portfolio in order to confirm accuracy of processing.

CLASS ACTIONS

PIM shall not have any responsibility to initiate, consider or participate in any bankruptcy, class action or other litigation against or involving any issue of securities held in or formerly held in a client account or to advise or take any action on behalf of a client or former client with respect to any such actions or litigation.

RECORD KEEPING

PIM or ISS, on PIM's behalf, maintains (i) copies of the proxy materials received by PIM for client securities; (ii) records of proxies that were not received and what actions were taken to obtain them; (iii) votes cast on behalf of clients by account; (iv) records of any correspondence made regarding specific proxies and the voting thereof; (v) client requests for proxy voting information (including reports to mutual fund clients for whom PIM has proxy voting authority containing information they need to satisfy their annual reporting obligations under Rule 30b-1-4 and to complete Form N-PX); (vi) documents prepared by PIM to inform and/or memorialize a voting decision,

including these policies and procedures and any documentation related to a material conflict of interest; and (vii) records of any deviations from broad Guidelines. Such records will be maintained for a minimum of six years.

POLICY REVIEW

The Proxy Voting Committee reviews these Voting Guidelines and procedures at least annually and makes such changes as it deems appropriate, considering current trends and developments in corporate governance and related issues, as well as operational issues facing PIM and applicable regulations under the Investment Company Act, Advisers Act and ERISA.
